TECHNICAL SKILLS

Frontend

React | TailwindCSS | JavaScript | HTML / CSS | VB.net

Backend & Data

Node.js | MongoDB | MySQL | PostgreSQL | RESTful APIs | SQL

Design & Tools

Figma | Adobe Photoshop | UI/UX Principles | Wireframing

Domains

Web Development | Data Science | AI Prompting | MS Office

EDUCATION

BSc Computer Software Engineering University of Stirling, RAK Campus

Sep 2024 – Jun 2028 (Expected)
Software Engineering · Web Dev · Data Structures · AI Fundamentals

Advanced Diploma — Computing Software Engineering Scottish Qualifications Authority (SQA)

Completed 2024
UK-recognised computing & engineering qualification

Grade 12

ABOUT ME

A **Computing Software Engineering** student at the University of Stirling with dual strength in **front-end development** (React, TailwindCSS) and **UI/UX design principles**, skilled at translating wireframes and design concepts into interactive, accessible web applications. Backed by hands-on internship experience in data analysis and API integration, with a growing full-stack portfolio built on Node.js and MongoDB. Actively seeking a software engineering or UI/UX design internship where technical depth and design sensibility can drive meaningful user experiences.

EXPERIENCE

Data Entry Intern

2026 – 2026

RAK Dental Care & Implant Centre — Ras Al-Khaimah, UAE

- Extracted, cleaned, and structured large clinical datasets using SQL, successfully **automating previously manual data workflows** and significantly reducing reporting turnaround time.
- Architected interactive data visualization dashboards by applying UI/UX principles to present complex operational metrics in a clear, stakeholder-ready format for non-technical audiences.
- Integrated external RESTful APIs and performed exploratory data analysis to identify workflow trends, delivering actionable insights that measurably improved operational efficiency.

Brand Ambassador

2024 – 2026

Premium FMCG Brands — Almarai · London Dairy · Kiri

- Spearheaded cross-functional customer engagement campaigns across high-footfall retail environments, leveraging multilingual communication (English, Arabic, Hindi, Urdu) to connect with diverse consumer segments.
- Applied user-centric problem-solving and consultative selling techniques to drive product adoption, consistently meeting and exceeding campaign KPIs through persuasive stakeholder engagement.
- Coordinated visual merchandising, inventory tracking, and booth setup — demonstrating meticulous attention to detail, self-organisation, and the ability to manage multiple deliverables simultaneously.

FEATURED PROJECTS

Virtual Study Buddy Matchmaker

Feb 2026 – Present

React · Node.js · MongoDB

Degree College, Mithi
Graduated Apr 2024

LANGUAGES

- English — Fluent
- Arabic — Conversational
- Hindi — Native
- Urdu — Native
- Sindhi — Native

CERTIFICATES

- EData Science – R basics — edx
- Adobe pgotoshop — Alison
- AI Conference — /function

- Engineering a full-stack web application designed to connect university students for peer-to-peer collaborative learning, with a focus on intuitive UX and inclusive design.
- Implementing JWT-based user authentication and a preference-driven matching algorithm, with a **MongoDB** backend architected to efficiently manage user profiles, study preferences, and session history at scale.

Cosmic Weather App

Nov 2025

React · TailwindCSS · Node.js · Open-Meteo API

- Engineered a fully responsive weather forecasting application that fetches and renders real-time meteorological data, achieving sub-second load performance across device breakpoints.
- Designed an intuitive, accessible user interface with TailwindCSS and integrated the Open-Meteo API to handle asynchronous data pipelines with robust error handling.

Classic Game Suite

Mar 2026

Java · VB.NET

- Engineered game logic and polished user interfaces for Sokoban, Tic-Tac-Toe, and Rock Paper Scissors, with a focus on clean architecture and smooth user interaction.
- Applied object-oriented programming principles and design patterns to manage game states, user input handling, and collision detection across all three titles.
